

## DAY/NIGHT KIT (optional)

The REDi-lite Day/Night kit was created so your REDi-lite light can be more than just a skylight during the day. The Day/Night kit allows you to choose between two power sources, Solar and the Grid. This is manually done by simply flicking a switch.

By having the switch mech in the Day position allows the light to be powered by the sun, if the switch is in the Night position then your light will be powered by the transformer. An additional on/off switch is provided for full control.

## LED LIGHT OPTIONS

REDi-lite uses world leading CREE LED's, Cree has the enviable status of manufacturing the most efficient LED in the world. Couple this with a solid all-aluminium light fitting, REDi-lite will produce light for many years to come.

\*6watt Small Recessed Round Light (110mm)

\*6watt Small Recessed Square Light (110mm)

\*24watt Recessed Round Light (330mm)

\*24watt Recessed Square Light (330mm)

24watt Surface Oyster Light (330mm)

\*Brushed Chrome trim also available

### Light Fitting Data

Size	Lumens	Colour Range
24watt	2500-2800	Cool white - 5000k Warm white - 3000k
6watt	600-700	Cool white - 5000k Warm white - 3000k

The Skylight Revolution

## ABOUT

The REDi-lite Solar Hybrid Skylight alternative offers a Green Energy solution for light starved areas around the home or office and is becoming a product of choice for ever increasing high density housing environments where shading from other buildings encroaches.

The REDi-lite Spectra system can be installed in almost any location unlike traditional skylights where building structure and difficult roof lines can often dictate placement.

Installation is also a breeze, simply mount the solar panel on the roof then run the interconnecting cable down to your REDi-lite light fitting... It's that easy!

## HOW IT WORKS

It works much the same as a skylight with a sun up sun down effect. As the sun rises the light gets brighter then as the sun goes down the light intensity reduces, it behaves just like a skylight.

## FEATURES

**Free to operate** - The REDi-lite light doesn't cost one cent to operate whilst being powered by the sun... yes that's right, FREE Light!

**Options** - A Special feature of the SPECTRA system is its ability to incorporate a Day/Night kit which enables the same lights to be used at night or during the day for full powered light.

**Quality** - Using only the highest of quality componentry coupled with exceptional warranties, The REDi-lite system aims to deliver years of trouble free uninterrupted light.

## KIT ARRANGEMENTS

There are four REDi-lite kit sizes to choose from, 30 watt, 65 watt, 135 watt and 250 watt.

The 30 watt kit will run 1 x 24 watt light load, the 65 watt kit has the capacity to operate 2 x 24 watt light loads, the 135 watt kit will handle up to 4 x 24 watt light loads and the large 250 watt kit will run up to 8 x 24 watt light loads.

Each kit comes complete with Solar Panel, mounting brackets, interconnecting cable plus the desired light fitting(s).

	Max lights per kit	Total	Day/Night kit option
<b>30 watt</b> 	1 x 24 watt light or 4 x 6 watt lights	24 watts	✓
<b>65 watt</b> 	2 x 24 watt lights or 8 x 6watt lights	48 watts	✓
<b>135 watt</b> 	4 x 24 watt lights or 16 x 6watt lights	96 watts	✓
<b>250 watt</b> 	8 x 24 watt lights or 32 x 6watt lights	192 watts	✓
